

Inhaltsverzeichnis Band 113, 114

| | |
|--|----------|
| Altomare, F.: Lototsky—Schnabl Operators on Compact Convex Sets and Their Associated Limit Semigroups | 114, 1 |
| Bartz, Krystyna Maria: On Some Connections between Zeta-Zeros and Square-Free Integers | 114, 15 |
| Becker, P.-G.: Algebraic Independence of the Values of Certain Series by Mahler's Method | 114, 183 |
| Bézivin, J.-P.: Sur Les Fonction Entieres Arithmetiques au Sens d'Abel | 113, 89 |
| On Entire Arithmetic Functions in Abel's Sense | |
| Blair, D. E., Koufogiorgos, Th.: Ruled Surfaces with Vanishing Second Gaussian Curvature | 113, 177 |
| Bugiel, P.: Invariant Measures of C^2 -Diffeomorphisms of Markov Type in R^d | 113, 255 |
| Cartwright, D. I.: Singularities of the Green Function of a Random Walk on a Discrete Group | 113, 183 |
| Cel, J.: Determining Dimension of the Kernel of a Cone | 114, 83 |
| Delange, H., G. Tenenbaum: Un Théorème sur les Séries de Dirichlet A Theorem on Dirichlet Series | 113, 99 |
| Derighetti, A.: On the Mathematical Work of Hans Reiter | 114, 175 |
| Filiman, P.: Rigidity and Alexandrov-Fenchel Inequality | 113, 1 |
| Frank, W.: Direkte Herleitung von notwendigen Bedingungen der Variationsrechnung bei Mehrfachintegralen im Sinne von Carathéodory | 114, 89 |
| Gardiner, St. J.: Angular Limits of Holomorphic Functions Which Satisfy an Integrability Condition | 114, 97 |
| Gindkin, S. G.: Some Notes on the Radon Transform and Integral Geometry | 113, 23 |
| Goebel, M.: Continuity and Fréchet-Differentiability of Nemytskij Operators in Hölder Space | 113, 107 |
| Grabner, D. J.: Farey Nets and Multidimensional Continued Fractions: | 114, 35 |
| Gregorac, R. J.: Iterated Means of Convex Bodies | 113, 189 |

| | |
|--|-----------------|
| Grekas, S., Gryllakis, C.: Measures on Product Spaces and the Excellence of Strong Baire Liftings | 114, 63 |
| Gryllakis, C., s. Grekas, S. | |
| Halter-Koch, F., Narkiewicz, W.: Commutative Rings and Binomial Coefficients | 114, 107 |
| Hebisch, W., Krawczyk, J.: A Remark on Discontinuous Translation Invariant Functionals on $L_p(G)$ for Certain Compact Groups G | 114, 111 |
| Hellekalek, P.: On the Boundedness of Weyl Sums | 114, 199 |
| Hlawka, E.: Hans J. Reiter † | 114, 171 |
| Hösel, V., Lasser, R.: One Step Prediction for P_n -Weakly Stationary Processes | 113, 199 |
| Ivić, A.: On the Error Term for the Counting Functions of Finite Abelian Groups | 114, 115 |
| Kepka, T., s. Niemenmaa, M. M. | |
| Koufogiorgos, Th., s. Blair, D. E. | |
| Krawczyk, J., s. Hebisch, W. | |
| Lasser, R., s. Hösel, V. | |
| Lewicki, G.: Bernstein's „Lethargy“ Theorem in Metrizable Topological Linear Space | 113, 213 |
| Mullen, G. L., Whittle, G.: Point Sets with Uniformity Properties and Orthogonal Hypercubes | 113, 265 |
| Mueller, Julia, Schmidt, W. M.: On the Newton Polygon | 113, 33 |
| Müller, W.: The Mean Square of Dirichlet Series Associated with Automorphic Forms | 113, 121 |
| Narkiewicz, W., s. Halter-Koch, F. | |
| Nilsen, R.: Topologically Invariant Linear Forms on Spaces of Abstract Distributions on a Locally Compact Abelian Group | 114, 77 |
| Niemenmaa, M., Kepka, T.: On a General Associativity Law in Groupoids | 113, 51 |
| Neumann, M. M.: Commutative Banach Algebras and Decomposable Operators | 113, 227 |
| Opozda, Barbara: Some Equivalence Theorems in Affine Hypersurface Theory | 113, 245 |
| Pannenberg, M.: Approximate Regularity of Commutative Beurling Algebras and Korovkin Approximation | 113, 275 |
| Papageorgiou, N. S.: Optimal Control and Relaxation of Nonlinear Elliptic Systems | 114, 209 |

| | |
|--|-----------------|
| Peri, C., Zucco, A.: On the Minimal Convex Annulus of a Planar Convex Body | 114, 125 |
| Perrone, D.: Torsion Tensor and Critical Metrics on Contact $(2n+1)$ -Manifolds | 114, 245 |
| Queffelec, H.: Quasi Sure Version of a Theorem of Littlewood | 114, 135 |
| Reczek, K.: An Abstract Approach to Rational Interpolation | 113, 311 |
| Schmidt, N. M., s. Mueller, J. | |
| Schoissengeier, J.: Change of Variables in a Multiple Integral for Local fields | 114, 139 |
| Sharp, R.: Prime Orbit Theorems with Multi-Dimensional constraints for Axiom A Flows | 114, 261 |
| Shereshevsky, M. A.: Ergodic Properties of Certain Surjective Cellular Automata | 114, 305 |
| Szwarc, R.: Linearization and Connection Coefficients of Orthogonal Polynomials | 113, 319 |
| Tenenbaum, G., s. Delange, H. | |
| Voit, M.: Strong Laws of Large Numbers for Random Walks Associated with a Class of One-Dimensional Convolution Structures | |
| Ward, T., Quing Zhang: The Abramov-Rokhlin Entropy Addition Formula for Amendable Group Actions | 114, 317 |
| Wegner, G.: Relative Newton Numbers | 114, 149 |
| Whittle, G., s. Mullen, G. L. | |
| Zucco, A., s. Peri, C. | |
